

V-Santa

V-Santa is a great addition to shopping malls, retail, corporate events, private parties and family entertainment centers. It can also find use in travel agencies, carriers, hotels, shopping malls and many other venues. Offer something new to your guests and your clients.

V-Santa offers a cost-effective solution to make branding and marketing activities during Christmas and let users take photo with Virtual Santa and receive the photo by email or print the photo on spot.

Features

- Implementation of elements provided by the client
- Automatically saved photographs
- Send the photograph to a chosen e-mail address
- Optional Photographs printed by the device
- Excellent quality
- Changing the background

HOW IT WORKS?

What is mobile remote technology?

V-Santa offers advance web trigger technology using external device. A QR code displays on screen allows user to start interacting with display using their own mobile device.

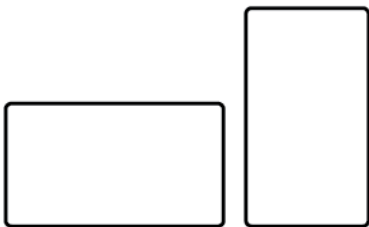

Branding

V-Santa comes with set of predefined scene and experiences for user to select. It also allows the business owner to simply add their branding and overlay content to the photos for the marketing and branding purposes.

Business owner would be able to add:

- Welcome messages (Text) with ability to define the text location, font size and color
- Logo with ability to define size and location
- Overlay image which acts as customized photo frame

FAQ

1. What display orientation is supported?

V-Santa supports both landscape and portrait display configuration.

2. Do we need touch screen to use V-Santa?

Having a touch screen display would be an ideal operation mode for V-Santa. However, it can operate using our Mobile remote technology.
